We all should get together and discuss. Sample results are in, however, I'm waiting on the START contractor to validate data. I'll be in the office tomorrow.

Bart are you in the office tomorrow?

Mark & Bart,

Do we have any plans or direction for me on scheduling a meeting with the community on the results of the testing? And/or the next steps we will be taking in the Superfund Process, since we haven't had a meeting with the Community since the ODEQ Meeting. I'm sure the Community has a lot of questions on the testing and our plans for the future.

(Last Communication from Community Involvement was the meeting on 1/30/2014 and the TAG availability notice in February 2014.)

(Removal actions August 2014 and December Residential Sampling.)

Thanks,  
Bill
